

SAFE TOUCHES

Safe touches is a 60-minute evidence based puppet workshop that teaches children about healthy boundaries, that it is okay to say 'no', and how to get help from safe adults.

What do they learn?

- Identifying their private parts (these are the parts covered by a bathing suit)
- The difference between a safe and a not safe touch
- How to refuse a not safe touch
- How to identify and tell a trusted adult about a not safe touch

What are the 4 safety tools?

1. Trust your feelings
2. Try to say "no"
3. Try to walk away
4. Tell an adult
